Passionate and detail-oriented Web Developer, adept at crafting visually captivating and user-friendly web applications. With a solid background in utilizing React.js, TypeScript, Next.js and more, I am committed to creating efficient and scalable code. With a results-oriented approach, I am ready to contribute to frontend

Experience

Sovcombank • Frontend Developer • Remote

February 2022 - Present

1) Developed a UI library that simplified project maintenance, improved project consistency, and accelerated the development process for the entire department. Utilized Rollup, TypeScript, Sass, Storybook, webpack, Material-UI, and Playroom to create reusable components and streamline frontend development workflows.

2) Implemented testing and configured Storybook for designers, testers, and product managers. Simplified their prototyping process and provided a visual representation of component designs with different data sets.

3) Developed over 30 landing pages for the bank, ensuring consistent branding and seamless user experiences. Collaborated closely with designers and stakeholders to bring their vision to life, creating engaging and visually appealing web experiences.

Center • Frontend Developer • Remote

September 2021 - February 2022

1) Developed a chat functionality that allowed users to ask private questions to administrators and moderators through video conferences in a project based on the open-source product [Jitsi Meet](#). Implemented the chat feature using React.js, Redux, and Websockets to enable real-time communication and enhance user engagement.

Freelance • Frontend Developer • Remote

July 2021 - September 2021

1) Developed an e-commerce website and admin panel for a company specializing in the sale of lumber and portable buildings. Built the website using React, Redux, Redux Thunk, Styled-Components, react-admin, and Firebase. The e-commerce site, [pilovochnik43.ru](#), enables customers to browse and purchase products, while the admin panel facilitates efficient management of inventory, orders, and customer data.

2) Created a landing page for a painting and finishing works company. Designed and developed the landing page using Next.js, nodemailer for contact form integration, and Sass for styling. The landing page, [www.molar-kazan.online](#), showcases the company's services, highlights previous projects, and provides a contact form for potential customers.

Skills

Technical: JavaScript, TypeScript, React.js, Next.js, **Others:** YouTrack, Trello, Confluence, Git (GitLab/Gatsby.js, Sass/Scss, Styled-Components, MaterialUI, GitHub)
Webpack, Rollup, Nest.js, Express.js, Docker, **Languages:** English (B1), Russian (native)
PostgreSQL, MySQL, GraphQL, REST, Jest, React
Testing Library, Storybook, Playroom

Education

Kazan National Research Technical University named after A.N. Tupolev (KNRTU-KAI)

• BA in Computer Science

September 2018 - June 2022
